In a challenging world....
...the natural choice
in feed management

Optizyme 361

Multi-enzyme complex for poultry

Uses

Convenient and stable multi-enzyme preparation for use in meal and pelleted feeds.

To enable a more complete digestion of feed and allow the use of less digestible, more economical ingredients.

Features

- Suitable for both maize and wheat based diets
- Multi-activity for optimum effect
- Free flowing powder easily mixes in feeds and premixes

Benefits

- Maximises digestibility of total feed
- Enhanced digestibility of poorer quality feed ingredients
- Reduces effect of feed variability
- Promotes better gut health
- Reduces moisture content and quantity of excreta
- Cleaner eggs, cleaner birds
- Reduces feed costs, improves profitability

Specification

Xylanase	11,000,000	BXU/kg
Beta glucanase	2,750,000	BU/kg

Inclusion Rates

Optizyme 361 powder	0.5 – 1.0	kg/tonne
---------------------	-----------	----------

Packing

Powder	10, 25 kg bags
