

Zetox

3-in-1 feed treatment

- **Anti-bacterial**
- **Anti-fungal**
- **Mycotoxin binder**

Uses

Animal feeds and feed ingredients can be subject to several forms of microbial contamination – moulds, mycotoxins and bacteria. Knowing the status of the contamination and how to treat it remains a difficulty for the feed or animal producer. Zetox is a convenient and economic solution for all these problems in one product.

Features

- Convenient combination product
- Powerful anti-bacterial
- Broad spectrum mould inhibitor
- Effective toxin binder
- Safe, non-corrosive
- Does not impair palatability or feed intake

Benefits

- Prevents harmful effects of bacteria, moulds and mycotoxins
- Safeguards natural nutrient content of feed
- Protects raw material quality
- Ideal multi-purpose use
- Easy to use, single addition
- No interaction with other micro-nutrients

Inclusion Rates

2 kg/tonne	Standard recommendation
4 kg/tonne	Sensitive feeds
6 kg/tonne	Heavy contamination

Packing

Powder	25 kg bags
